

Your outdoor space is one of the most frequently used areas of your homes. This guide has all the essential tips and tricks on how to create a functional, beautiful and safe outdoor space for you and your loved ones to enjoy all year long.

Pool Tiles:

Bask in the Sunshine

Every family uses their pool space in different ways – to play, relax and unwind, read, soak up some rays and maybe even exercise.

You can either tile the entire pool or just the water line with color choices ranging from sandy hues to blues and aquas.

PRO TIP: Not all tiles can be used in wet areas. Be sure to look for a mosaic or tile that is rated for water submersion.

▲ Nassau Tile's Favorite Pick: **Fiji Blue Mosaic**

Pool Decks:

Your pool deck is where you relax, unwind, read and soak up some rays.

Thick Non skid Porcelain pavers are the modern choice for pool decks and can be set directly in sand, grass or gravel.

PRO TIP: Porcelain pavers are also the perfect choice for your driveway

Nassau Tile's Favorite Pick:
Eiche Landhaus Porcelain Paver

Patios & Walkways: Chill, Eat, Play and More

Your patio is where you entertain and enjoy year round outdoor living.

Non-slip porcelain tiles are definitely the way to go because they are easy to clean, long lasting and come in different colors, shapes and styles to suit your unique space.

PRO TIP: Be sure to check the grip rating of any outdoor surface to make sure it is safe. We recommend non slip or antislip porcelain tiles as the safest and most durable outdoor surface.

Nassau Tile's Favorite Pick: **Block Bianco**

Important note on slip resistance:

Nothing is guaranteed to be 100% slip proof. We recommend using appropriate slip resistant tiles that meet the necessary standards for your application.
